

SC Series Loudspeaker Cable

SC-01 Loudspeaker Cable

This is the Xindak SC series standard loudspeaker cable, the base material of which is from the original American Monster finished loudspeaker cables, inside including 4 groups of red and white wires, each group of which is made of by 6 groups of 41-strands 0.125 mm 5N OFC(OXIDE FREE COPPER) wires through spiral winding. There is a 0.4mm acoustic nerve wire between each group 24K gilded banana plug or fork is up to user' option.

The tone color of this cable is full and thick with mellow sound. The music density and levels of medium and low frequency is quite satisfactory. Low frequency is concentrated with satisfactory dynamics, depth and elasticity. It can effectively correct the acoustic system with excessively thin and bright tone color and less full low frequency.
